

Fatai Azeez Olatunde

JUNIOR DevOps ENGINEER

Detail-oriented Junior DevOps Engineer with hands-on experience in Linux, Docker, AWS EC2, Nginx, Git, GitHub, and CI/CD. Proficient in containerizing applications, deploying web solutions to cloud infrastructure, configuring web servers, and troubleshooting Linux-based environments. Eager to leverage technical skills in an entry-level DevOps role while contributing to a dynamic engineering team and advancing expertise in cloud infrastructure and automation. Committed to continuous learning and professional growth within the evolving landscape of DevOps practices.

Work Experience / Project

2026 - 2026-08	DevOps Engineer <i>Personal Project, Nigeria</i> • Monitored system health with logging and alerting tools to resolve incidents quickly. • Improved system reliability by refining automation, configuration, and support processes. • Developed and containerized a personal portfolio website using Docker and Nginx. • Deployed the application to an AWS EC2 Linux server. • Configured Security Groups, SSH access, and Docker port mapping. • Managed and troubleshooted the deployment using Linux and Docker CLI. • Used Git and GitHub for source-code management. • Designed and implemented containerization strategies using Docker and Kubernetes, improving resource utilization and management.
